

Assignment - 0: COURSE INSIGHTS

E-waste & Environmental Management (VEC02) | TE INFT, Semester V | 2026-27 Odd Semester

Name: Meet Alshi

Roll No.: 24101B0049

Division: B

Answers are taken from the course AAP. Items in *[Fill in]* are personal or not stated in the AAP; please complete them yourself.

Q. No.		Question	Answer
Q.1	1a	How many buckets are there in VIT autonomous curriculum (syllabus)?	7 buckets: BSC/ESC, Program Courses, Multidisciplinary Courses, Skill Courses, HSSM, Experiential Learning and Liberal Learning.
	1b	In which bucket is this course (subject) included?	Course code VEC02 - E-waste & Environmental Management (core as per NBA). <i>[Fill in: tick the bucket marked in the AAP's Teaching & Examination Scheme table]</i>
	1c	How many credits need to be completed from this Bucket?	<i>[Fill in: see curriculum booklet / VMIS for your bucket]</i>
	1d	How many credits from this bucket have you completed till now?	<i>[Fill in: your own credit count up to Sem IV]</i>
	1e	How many credits does this course have?	2 credits (2 theory hours/week; no practical or tutorial).
Q.2	2a	Have you gone through the curriculum of your course?	Yes. The syllabus has 6 modules (30 teaching hours): Overview of E-waste, E-waste Recycling, Exposure pathways & health risk, E-waste Rules of India & international legislation, Technological advances for environmental problems, and Environmental Assessment & Management.
	2b	Is there a pre-requisite of this course?	Yes - 12th standard Environmental Science.
	2c	If yes, do you clearly remember the concepts of the pre-requisite course?	<i>[Fill in: answer honestly, e.g. 'Yes - pollution, ecosystems, waste' or 'Partly - need to revise ...']</i>
	2d	Preparations needed for this course.	Revise 12th Environmental Science (pollution, waste, sustainability); create Kahoot and Edpuzzle accounts for the online activities; keep Python/Excel/Tableau ready for the Data Analysis activity; join the TE INFT EWEM Teams group and the V-Refer page; read the AAP and the e-waste links listed in it.
	2e	Future courses that build on this course.	Environmental Management (Semester 7 or 8).
Q.3	3a	List all COs and mention which CO you find most useful.	CO1 Understand need and concept of e-waste management & recycling (Module 1). CO2 Gain knowledge of legislative rules and regulations related to e-waste management (Module 4). CO3 Recognize tools and technologies required for e-waste recycling assessment and monitoring (Module 2). CO4 Address contemporary issues and analyse local and global impact of computing and engineering solutions on individuals, organizations and society (Modules 5, 6). CO5 Apply knowledge of e-waste management in routine daily life to minimize hazards (Module 3). Most useful (sample): CO5, because it can be applied immediately in daily life, such as disposing of old phones, chargers and laptops responsibly. <i>[Fill in: change if you prefer another CO]</i>

Q. No.		Question	Answer
	3b	How are these COs mapped to the POs?	All five COs have the same mapping (as per AAP): Strong (S): PO1 Knowledge, PO7 Environment & Sustainability, PO9 Teamwork, PO12 Lifelong Learning. Medium (M): PO2 Analysis, PO3 Design, PO4 Investigation, PO6 Society. Weak (W): PO5 Modern Tools. Not mapped (-): PO8 Ethics, PO10 Communication, PO11 Project Management.
Q.4	4	Where do you see the applications of this course in real life and industry?	Real life: disposing of used computers, TVs, phones, refrigerators and charging cables through authorised collectors; understanding take-back and recycling. Industry: authorised e-waste recyclers (e.g. Eco Recycling Ltd / Ecoreco, Mumbai); producers and IT companies complying with E-Waste (Management) Rules 2016 and EPR; data-centre and IT asset disposal; green buildings and ISO 14001 certification; EIA and environmental clearance for projects; remote sensing/GIS for environmental monitoring.
Q.5	5a	Select one Top university outside India and mention the name of their similar course.	The AAP lists IIT Kharagpur - 'Electronic Waste Management - Issues and Challenges' (Prof. Brajesh Kumar Dubey, NPTEL) as the benchmark course. <i>[Fill in: choose one top university outside India and write its course title]</i>
	5b	How does their curriculum compare with our course?	The NPTEL course covers the e-waste scenario in India versus other countries, exposure pathways of pollutants from recycling, E-Waste Rules of India (2011 and 2016), and case studies from around the world. These match our Modules 1, 3 and 4. Our course is broader because it also covers recycling technologies (Module 2), green buildings, carbon credits, disaster management, GIS (Module 5) and EIA, ISO standards and pollution control boards (Module 6). Theirs is a 4-week, 30-hour online course; ours runs over 15 weeks with activity-based assessment.
Q.6	6a	How many lecture sessions are planned?	30 lectures over 15 weeks (2 per week), semester 06/07/2026 to 23/10/2026.
	6b	Suggested Textbooks, Reference books, E-books and Research papers. Available in library? Accession numbers?	Textbook: Environmental Science - G. Tyler Miller Jr. & Scott Spoolman, Brooks/Cole, 13th ed. (in library: Yes). Reference books: (1) Electronic Waste Management - Hester & Harrison (No); (2) Electronic Waste - Fowler B., Elsevier (No); (3) E-waste: implications, regulations and management in India - Johri R., TERI Press (No); (4) Environmental Management, Text Book and Cases - Krishnamoorthy B., PHI (No); (5) Environmental Science and Engineering - Keerthinarayana & Daniel Yesudian, Hi-Tech Publications, 2008 (Yes). E-books: Electronic Waste Management Rules 2016 - CPCB (No); WEEE: Flows, quantities and management, a global scenario - Mihai et al., HAL (No). Research papers (all not in library): Halim & Suharyanti (2020), IJIEEM; Saravanamurthy et al. (2018), IJERT; Mor et al. (2021), ScienceDirect; Monica & Kishore (2010), Indian J. Community Medicine; Garg & Adhana (2019), IJMTE. Accession numbers: <i>[Fill in: not given in AAP; note them from the library catalogue for Miller and Keerthinarayana]</i>
	6c	What resources are currently uploaded on V-refer?	The AAP and the Lecture Guide (both uploaded 18/07/2026). The V-Refer link is http://vidyalankarlive.com/vrefer/index.php/f/1086833 . <i>[Fill in: add anything else you see uploaded]</i>
	6d	Stipulated office hours of faculty.	Thursday, 4.00 to 5.00 pm, D101 Faculty Room (TE INFT).
Q.7	7a	Evaluation metric - weightages for ISA, MSE and ESE.	This is a 75-mark course assessed fully by ISA: ISA 100% (75 marks) , MSE nil, ESE nil.

Q. No.		Question	Answer
	7b	What does ISA comprise of?	Class participation, Kahoot online game quiz, Edpuzzle video task, Carbon Footprint Calculator, Device Anatomy activity, Class test with peer assessment, Case study, Data Analysis activity, Sustainability Reel/Podcast, Green Hackathon (mini project), and Campus Sustainability Consultancy (E-waste audit + awareness campaign).
	7c	Evaluation rubric for ISA?	Kahoot 5, Edpuzzle 5, Carbon Footprint 5, Device Anatomy 5, Class test 10, Case study 10, Data Analysis 10, Reel/Podcast 10, Green Hackathon 10, Campus Consultancy 10. Class participation carries no marks ('--'). <i>Note: these add up to 80, while the AAP states a total of 75. Confirm with the faculty how the final 75 is derived.</i>
	7d	Dates of MSE.	Not applicable - the course has no MSE.
	7e	Date of ESE.	Not applicable - the course has no ESE.
Q.8	8a	Is there an allied Practical Course?	No. The AAP shows no practical hours or practical credits.
	8b	Credits of the practical course.	NA
	8c	Evaluation metric for the practical course.	NA
	8d	Dates of ESE for the practical course.	NA
Q.9	9	Date of declaration of result?	<i>[Fill in: not in the AAP; check the academic calendar / notice board. Semester ends 23/10/2026]</i>
Q.10	10	When does the next Academic Term start?	<i>[Fill in: not in the AAP; check the academic calendar. This term runs 06/07/2026 to 23/10/2026]</i>
